A Complete System For Legal Pasteurization Of Dairy Products

Affordable  Efficient  Easy To Use

Cold Water Circulation Pump
Cold/Ice water can be pumped through the jacket to cool the milk.

Add On Kit Preheat Vat with Temperature Controller
This is used to preheat milk so additional batches can be quickly pasteurized one after another. This makes it possible to make multiple, sequential batches. Different products being made with each batch.

Cold/Ice water can be pumped through the jacket to cool the milk.

If you are using the Add On Kit Preheated milk is placed in the water jacket. The pasteurization lid is set in place and the milk is legally pasteurized.

Digital Indicating Thermometers and Dual Pen Chart Recorder to document the pasteurization process including both product and airspace temperatures. Includes switches and controls for both the product and airspace heaters.

Add On Kit Cooling Jacket and Vat
A Vat of pasteurized milk is placed in the Cooling Jacket and Cold/Ice water is pumped through the jacket to cool the milk.
